RU-00000A-18-0284

Dear Chairperson Peterson and Commissioners,

As people of faith, spirit and conscience in Arizona, we are writing to express my support for the current version of the clean Energy Rules being considered by the Arizona Corporation Commission.

- 50% reduction from baseline emissions by December 31st, 2032
- 65% reduction from baseline emissions by December 31st, 2040
- 80% reduction from baseline emissions by December 31st, 2050
- 95% reduction from baseline emissions by December 31st, 2060
- 100% reduction from baseline emissions by December 31st, 2070

As active members in this community, we, like you, are charged to consider the larger, moral implications of my actions. The climate crisis, caused by the burning of fossil fuels, is a moral issue that requires immediate action and transcends all political divides.

Besides that, moving to solar and wind generation, makes good economic sense. Clean energy technologies are already competitive with fossil fuels.

As people of faith and conscience, the ultimate question is "What kind of world do we want to leave to those who come after us?" Please vote yes to move the Energy Rules package forward without any delays for a cleaner, healthier, and more just energy future.

Sincerely,

Alexander Meyer
